SECTION 2

LOGO SYSTEM

2.1 Main Logo

2.2 Logo Variations

ON WHITE

Our main logo should be used with our primary brand colors on a white background.

The logo consists of the word "MOVETES" in a bold, sans-serif typeface. The letter "M" is composed of three vertical bars: a light blue bar on the left, a dark blue bar in the middle, and an orange bar on the right. The remaining letters "OVETES" are a solid dark blue. The entire logo is centered horizontally on a white background.

MOVETES

KNOCKED OUT

When the primary logo is used on a dark color, the navy blue should be completely knocked out using a solid white.

SINGLE COLOR

When the primary logo needs to be converted to a single color, the brand navy blue should be used.

MOVETES

VERTICAL

When the primary logo needs to be vertically-oriented, the full color logo should be used. If a single color is needed, the brand navy blue should be used.

ICON

When the primary logo is used in a square or as an icon, the following variations may be used.

PRIMARY COLORS

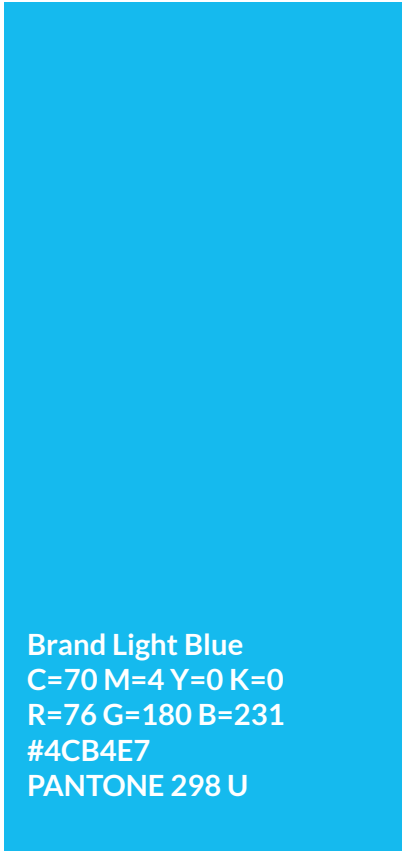

Our color palette is bold and impactful. The primary colors are minimal and sophisticated and should be used with a fair amount of white space.

PRINTING NOTES

Pantone colors should be used whenever possible to maintain a consistent brand color system on all materials.

Fonts

4.1 Typography & Fonts

OUR FONTS

We use Dosis Regular for both headlines and subheadlines.

When used for headlines, the copy should be formatted using all caps. Subheadlines should be formatted using traditional sentence case. In terms of color, both should stick to the primary brand colors.

We use Lato Regular for long form body copy. It should be used on content that needs time to be consumed.

We use Jenna Sue Pro for any copy that needs to appear like it was handwritten.

STYLE THAT DRIVES YOU

Long paragraphs will always read much better when using Lato Regular. It should be considered the default body copy used for any and all materials with extended information.

IMAGE DIRECTION

5.1 Lifestyle Shots

5.2 Solid Overlay Treatment

5.3 Gradient Overlay Treatment

CREATE A LASTING IMPRESSION

Our images should always be very visual and impactful. We want the images to feel relatable and help the customer envision themselves living the lifestyle that Movetes is trying to promote.

SOLID OVERLAY TREATMENT

When applying a tint or overlay treatment to an image, we'll want to use only the Movetes brand colors. We'll also want to grayscale the original image so the colors do not clash with the overlay. Use the Brand Navy Blue when trying to darken a lighter image to accommodate white or light colored text. Use White to lighten a darker image to accommodate darker colored text. Never use the navy blue logo on a dark background or the white logo on a light background. There should always be a nice contrast between the two.

GRADIENT OVERLAY TREATMENT

When we only need part of an image darkened or lightened, we'll want to use a gradient overlay using either the Brand Navy Blue or White.
